

WESTERN HIGH SCHOOL

4600 FALLS ROAD
BALTIMORE, MARYLAND 21209

October 26, 2009

Dear Parents,

City Schools and the Baltimore City Health Department have been carefully monitoring H1N1 Influenza (also known as “Swine Flu”). At Western, we are trying to keep all of our students healthy. Attached is information that you may use to reinforce basic hygiene measures to help students prevent contracting and spreading the flu.

It is expected that there may be some reported cases throughout the flu season. By getting your child vaccinated, keeping her home when she is sick, and teaching her the importance of washing hands and covering coughs, you may help keep your daughter healthy this school year. For more information about influenza and how to protect your family, you may always call 311 or visit the Baltimore City Health Department website at www.baltimorehealth.org/swineflu.

We look forward to your assistance in keeping your child healthy so that we may continue to provide her the best education possible. Thanks for your support.

Sincerely,

Eleanor P. Matthews
Principal
